Summary

Computer Science graduate with a strong foundation in software engineering, Python, Java, Data Structures & Algorithms, and web development. Passionate about building scalable, user-focused applications while writing clean, efficient, and maintainable code. Strong analytical, problem-solving, and collaboration skills with hands-on experience developing real-world projects. Seeking an entry-level Software Engineer role to contribute to innovative products while continuously learning and growing as a developer.

Technical Skills

Languages: Java, Python, C, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frameworks & Technologies: React.js, Tailwind CSS, REST APIs, FastAPI

Databases: MySQL, PostgreSQL, Neon

Testing & Deployment: PyTest, Docker, Render, Netlify, Vercel

Developer Tools: Git, GitHub, VS Code, Postman

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, OS, Computer Networks

AI & Productivity: ChatGPT, Gemini, Claude, Cursor, Github Copilot, Antigravity

Projects

folio - Job Application Tracker | *React, TypeScript, FastAPI, Postgres, OAuth2* [Github](#) | [Live Demo](#)

- Built a full-stack Kanban tracker using React, TypeScript, and FastAPI (Python) to manage 100+ job applications across 4 interactive pipeline stages.
- Designed async REST APIs with PostgreSQL and SQLAlchemy, utilizing database connection pooling to achieve <50ms response times
- Implemented secure JWT authentication with Argon2 hashing, real-time search filters, and recruiting funnel analytics, deploying to Vercel and Render with 99.9% uptime.

Exspend - An Expense Tracker | *React.js, Tailwind, FastAPI, Postgres, OAuth2* [Github](#) | [Live Demo](#)

- Built a full-stack tracker with 9 REST endpoints (auth, profile/budget, expenses) and JWT sessions that last 24 hours, using bcrypt hashing and user-scoped queries.
- Delivered expense CRUD plus a dashboard that tracks monthly spend vs a \$1,000 default budget, 6 categories (Food, Rent, Utilities, Entertainment, Travel, Other) with % breakdown, and the 10 most recent transactions.
- Added 4 list filters (category, text search, start/end date) and 4 sort modes (date/amount, asc/desc) so users can slice history without extra pages.

E-Commerce App | *React.js, Tailwind, Clerk Auth* [Github](#) | [Live Demo](#)

- Deployed a responsive e-commerce web application using React and Tailwind CSS to deliver a modern, scalable, and user-friendly interface.
- Integrated Clerk authentication for secure user sign-up, login, and session management.
- Enhanced product browsing, dynamic filtering, and seamless cart management using a mock e-commerce API for an interactive shopping experience.

Education

CMR Institute of Technology

B.Tech - CSE (Data Science), CGPA - 8.72

2022 – 2026

Hyderabad, Telangana

Certificates

- Smart Coder **Gold Certificate** by Smart Interviews (Advanced DSA Training) [\[Link\]](#)
- Java Basic Certificate by HackerRank [\[Link\]](#)
- Postman API Fundamentals Student Expert Badge [\[Link\]](#)

Achievements

- Solved **500+ DSA problems** across LeetCode, CodeChef, and GeeksforGeeks – demonstrating strong algorithmic thinking and data structures proficiency.
- Selected as **Open Source Contributor** at GirlScript Summer of Code (GSSOC) 2025 – Contributed to open-source repositories by working in feature branches, raising PRs, and collaborating with distributed teams in a real-world Git workflow
